

# Big Analysis of Muons 2021

22 May 2021

Hello everyone,

I just got a warning from CERN about the security of the CMS webinar. As a result, I've changed the passcode for the three CMS webinars. CMS participating teachers, you will need to inform your students. The ATLAS webinars are not affected.

Here is the new connection information:

- All three **CMS** webinars (13:00 UTC 24-26 May): ---, passcode ---
- All three **ATLAS** webinars (19:00 UTC 24-26 May): ---, passcode ---.

Regarding security for all BAM webinars:

- Please only share the webinar meeting information with those of your students who are part of BAM.
- Please do not post this information on the internet or, especially, on social media.
- Please ask your students to observe these same security measures.

Thank you and have a nice weekend,

Ken
